

AI DATA TECHNIX

Building Intelligent Software. Powering Digital Innovation.

AI • SOFTWARE DEVELOPMENT • AUTOMATION • DATA SOLUTIONS

ABOUT US

Technology That Solves Real Business Problems.

AI Data Technix is a technology-focused software company dedicated to building intelligent digital solutions for modern businesses.

We combine software engineering, artificial intelligence, automation and data technologies to help businesses simplify complex processes, improve efficiency and embrace digital transformation.

Our mission is to empower businesses through **intelligent, practical and scalable technology.**

INTELLIGENT

Solutions designed to make business processes smarter.

SCALABLE

Technology built with growth, flexibility and maintainability in mind.

PRACTICAL

Focused on solving real business challenges with measurable value.

Our Technology Capabilities

AI & MACHINE LEARNING

AI-powered applications, intelligent data processing, OCR and computer vision.

CUSTOM SOFTWARE

Business applications designed around specific workflows and requirements.

WEB APPLICATIONS

Modern, responsive and scalable web-based applications.

BUSINESS AUTOMATION

Automating repetitive processes to reduce manual effort and improve productivity.

DATA SOLUTIONS

Data extraction, processing, management and analytics.

API & SYSTEM INTEGRATION

REST APIs and integrations connecting applications and business systems.

Solutions Built Around Your Business

INTELLIGENT BUSINESS SYSTEMS

Digitize and centralize business operations with custom software built around your workflow.

Management Systems • Dashboards • CRM • HR • Inventory • Reporting

AI-POWERED SOLUTIONS

Use AI to extract information, process data and automate intelligent tasks.

OCR • Computer Vision • Document Processing • Data Extraction

PROCESS AUTOMATION

Transform repetitive manual workflows into efficient digital processes.

CUSTOM DIGITAL SOLUTIONS

Technology designed specifically around your business requirements.

Technology designed around your business, not the other way around.

Building Intelligent Systems With AI

We develop AI-enabled solutions that transform images, documents and business data into structured and actionable information.

COMPUTER VISION

Detect and analyze objects, images and visual information.

OCR & DATA EXTRACTION

Convert documents and images into structured digital data.

INTELLIGENT PROCESSING

Automate repetitive data interpretation and processing tasks.

AI-POWERED AUTOMATION

Combine AI with software workflows to reduce manual operations.

VISUAL FLOW

UNSTRUCTURED DATA

AI PROCESSING

STRUCTURED INFORMATION

BUSINESS ACTION

BUSINESS SOFTWARE

Business Software That Works Around Your Workflow

We design and develop software systems that help organizations manage operations, people, data and workflows from a centralized platform.

Management Systems

Centralized control of business operations.

Employee & Workforce Solutions

Digital management of employee-related processes.

Dashboards & Reporting

Real-time visibility into important business information.

Data Management

Organized storage, retrieval and processing of business data.

Role-Based Systems

Different access levels for administrators, managers and users.

Custom Workflows

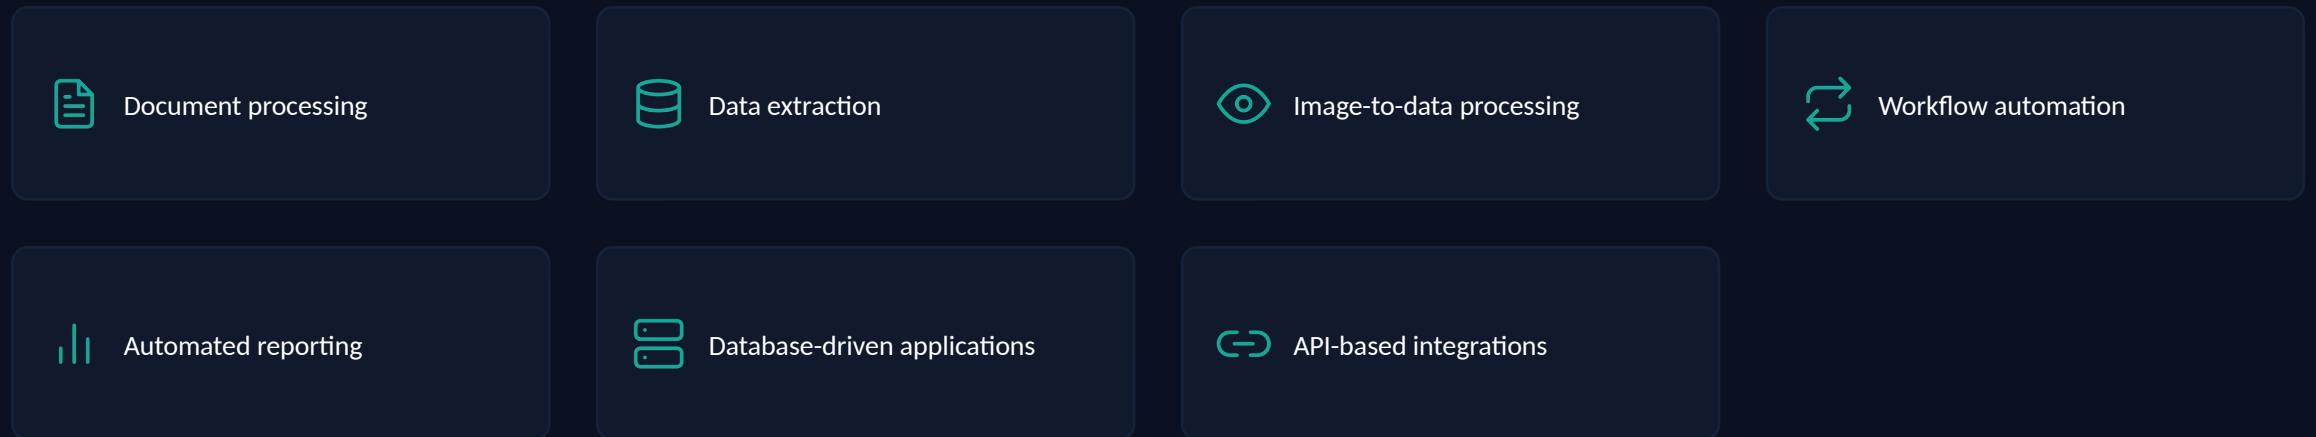

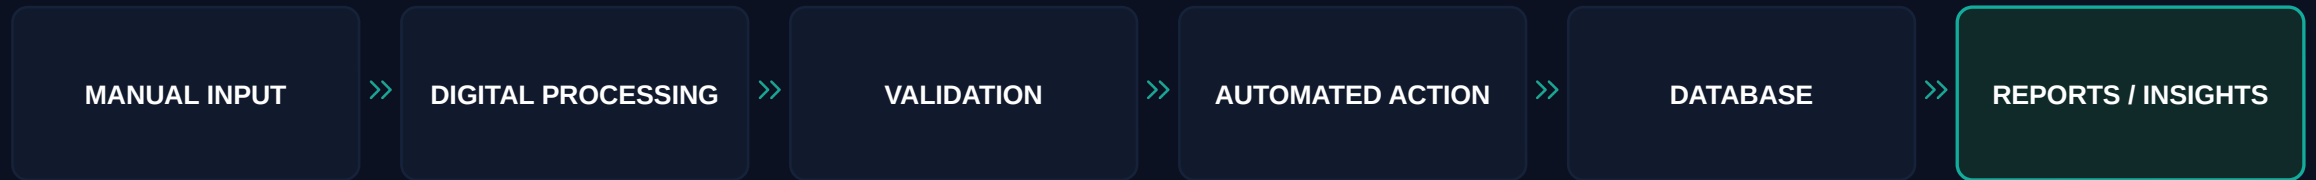

Software designed according to actual operational processes.

Your workflow. Your requirements. Your software.

AUTOMATION

Turning Manual Processes Into Digital Workflows

Manual and repetitive processes consume time and introduce unnecessary errors. We help businesses identify these processes and convert them into automated digital workflows.

Less manual work. Better processes. More time for business growth.

OUR PROCESS

From Idea to Production

01 — DISCOVER

Understand the business problem, users and requirements.

02 — DESIGN

Define architecture, workflows and user experience.

03 — DEVELOP

Build reliable software using modern development practices.

04 — DEPLOY & IMPROVE

Deploy, maintain and continuously improve the solution.

Idea → Architecture → Development → Testing → Deployment → Improvement

Technology We Work With

Programming

Java • Python • JavaScript • SQL

Backend

Spring Boot • Django • Flask • REST APIs

Frontend

React • HTML • CSS • Bootstrap

Database

MySQL

AI / ML / Computer Vision

OpenCV • YOLO • OCR • TensorFlow

Development Tools

Git • GitHub • VS Code • Eclipse

EXPERIENCE

Experience Across Real-World Technology Use Cases

Our development experience spans multiple technology domains, allowing us to approach business challenges from both a software engineering and intelligent automation perspective.

AI & COMPUTER VISION

Image recognition, detection and intelligent visual processing.

DOCUMENT INTELLIGENCE

OCR, document processing and automated information extraction.

BUSINESS APPLICATIONS

Custom management systems and operational platforms.

DATA PROCESSING

Structured data extraction, storage and transformation.

WEB APPLICATIONS

Responsive business applications and dashboards.

AUTOMATION

Digital workflows that reduce repetitive manual operations.

Technology experience across AI, software, data and automation.

WHY US

Why Work With AI Data Technix?

BUSINESS-FIRST APPROACH

We understand the problem before selecting the technology.

AI + SOFTWARE ENGINEERING

We combine intelligent technologies with reliable software engineering.

CUSTOM SOLUTIONS

Solutions designed around your business instead of generic workflows.

SCALABLE ARCHITECTURE

Systems designed with future growth and integration in mind.

TRANSPARENT DEVELOPMENT

Clear communication and structured development throughout the process.

LONG-TERM TECHNOLOGY PARTNER

We aim to build relationships, not just deliver software.

We don't just build software.

We build solutions around business problems.

Let's Build Something Intelligent.

Have a business problem, idea or manual process that you want to transform? Let's explore how AI, software and automation can create a smarter solution for your business.
